

Microsoft Publisher Summative

Magazine Cover

1. Choose a magazine concept and name for your “magazine cover”. You can use an already existing magazine or make one up. The cover should have some element that includes or reflects YOU. This could be anything...the name, main picture, or feature story, etc.
2. Create a one-page magazine cover using as many Microsoft Publisher functions as possible. You will set the page up as Letter size (either portrait or landscape) and complete your cover so that it has an authentic “magazine look.”
3. If needed, reference actual online samples/versions to help you with ideas. Ensure your theme and content is appropriate. Be creative and have fun!
4. Spell Check your cover and save it in your m:/. Then drag and drop the file into your hand in folder (found in the class *HandIn* folder).
